Conservation Practices on Mount Cameroon Forest Region Funded by WWF-USA (Russell E. Education for Nature Program)- 2014

ICENECDEV organized a 2-Day Training-the-Trainers Workshop on Forest conservation practices (Ecotourism, Agroforestry, Fuel Efficient Stoves and Beekeeping) in Cameroon (11th and 12th 2014), financially supported by WWF-USA (Russell E. Education Program for Nature). The workshop was aimed at reducing the rate of deforestation on the mount Cameroon forest region that contributes to climate change. The participants were drawn from South west, Littoral and North West, involving 32 stakeholders in 3 forest region in Cameroon.

ICENECDEV donated seed of trees of leucaena to the following institutions/groups; Borstal Institute, Baptist High School, Government primary School Lysoka, Regional Delegation of Environment, Protection of Nature and Sustainable Development. The training manuals on the forest conservation practices were distributed among all of the stakeholders for institutional strengthening and establishment of forest conservation projects in village communities in the mount Cameroon forest region.
